

Speciation and the Web of Life

Under MHRD Scheme on Global Initiative of Academic Networks (GIAN)

21 August to 7 September, 2016. IISER Thiruvananthapuram

Overview

The goals of this course are to introduce the students to some of the canonical literature concerning the process of speciation and discuss the paradigm of divergence-with-gene-flow represented by the web-of-life metaphor. A series of lectures and discussions presenting a distillation of many studies of natural hybridization, lateral exchange and viral recombination will be covered. By the end of the course, students will have an increased awareness of both where current studies in speciation/hybridization fit into the history of such investigations and the ongoing shift in the paradigm used to describe the process of evolutionary diversification.

Instructors

Dr. Michael Arnold
University of Georgia, USA

Dr. Rohini Balakrishnan
IISc Bangalore

Dr. Ullasa Kodandaramaiah
IISER Thiruvananthapuram

Dr. Hema Somanathan
IISER Thiruvananthapuram

Dr. Praveen Karanth
IISc Bangalore

Dr. Sutirth Dey
IISER Pune

Dr. Amitabh Joshi
JNCASR Bangalore

Dr. L.S Shashidhara
IISER Pune

Dr. HA Ranganath
Bangalore University

Dr. Krushnamegh Kunte
NCBS Bangalore

Registration

Online Application for the course is available at <http://gian.iisertvm.ac.in/speciation>
