Topics in the Syntax of Indo-Aryan Languages

(with a focus on the Western Indo-Aryan)

Overview

The Department of Linguistics, University of Mumbai under the GIAN scheme is organizing a Special Lecture Series on the topics in Syntax-Semantics of Indo-Aryan languages. The Lecture Series will exert special emphasis on the Western Indo-Aryan languages like Marathi, Gujarati, Kutchi, Konkani, Sindhi, Punjabi among others.

Many of these languages have not been adequately described in the light of latest theoretical developments and tool-kits of Modern Linguistics. Detailed description of phenomena in these languages may also challenge the existing linguistic theories and lead to further theorization. The description of these languages can be utilized in Natural Language Processing, machine translations and various other applications of Computational Linguistics as well as in language-related applications of Health Sciences and understanding the relationship of language and brain. This lecture-series will initiate the process of building such a repository. Thus, an endeavour to analyse Indo-Aryan language is of empirical, theoretical and applicative significance.
